The learning

Teachers will be driving the boys' learning through the work set on class pages in *Sc____b_*. All classes will use the same learning template, examples of which are shown below. Every task is designed as a step in a longer-term learning sequence. They are designed to be learning driven, embedding knowledge and skills needed to advance in that subject.

The instructions set on *Sc____b_* are the first port of call for students. Before the "school day" starts, they should begin by checking the remote learning boxes on each of their timetabled classes for the day. They need to be aware of what classes they have that day and if they are expected on a *G___ M_* or other forum at the start of the lesson.
